

CYGNUS

CygLink is a Windows® based application for computer use to display continuous A-Scan output and measurement data. CygLink has the facility to log both data formats into a Survey file for report presentation, which can be emailed, exported as a PDF, or printed.

CYGNUS CYGLINK SOFTWARE KEY FEATURES

GO TO
CYGLINK
SOFTWARE
PAGE

- Transfer and manage data logger records, A-scans, B-scans, templates, measurement comments and material velocity tables
- Measurements can be logged and gauge settings can be adjusted (including velocity of sound)
- Measurements can be recorded in a linear list or a two-dimensional grid
- Generate PDF reports and export to Excel, allowing for after-the-event analysis of logged measurements
- Displays thickness measurements, A-scans and B-scans at the surface
